DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamanaka et al.

As per claims 1 and 2, Yamanaka et al. discloses a carbon dioxide refrigeration cycle comprising compressor 100, outdoor heat exchanger 110, expander 130, indoor heat exchanger 150, and bypass line 170 parallel to the expander, control valve 180, wherein an optimal high pressure controlled by controlling the bypass ratio of the control valve (see column 8, line 58 – column 9, line 62; Figures 10 and 13) to optimize the coefficient of performance of the system (see for example Abstract, lines 13-14).
